Environment:

Windows Server 2012 R2 (x64)

2 GB RAM, with 2 virtual processors hosted on Macbook with SSD disk

Subversion 1.9.0-dev from trunk@r1605444

Test data: Ruby project repository (46054 revisions, 400mb-500mb size on disk)

All tests are performed using default options.

Every test was run 3 times and only two latest used

Tests performed:

1. svnadmin dump >nul

2. svn log http://localhost/svn/repo >nul

3. svn log file:///D:/Repositories/repo >nul

4. svn export -q http://localhost/svn/repo/trunk wc

5. svn export -q file:///D:/Repositories/repo/trunk wc

Legend:

GREEN -- the best performance along all configurations

RED -- the worst performance along all configurations
